

Flatliner™ Pulsation Dampeners

By White Knight

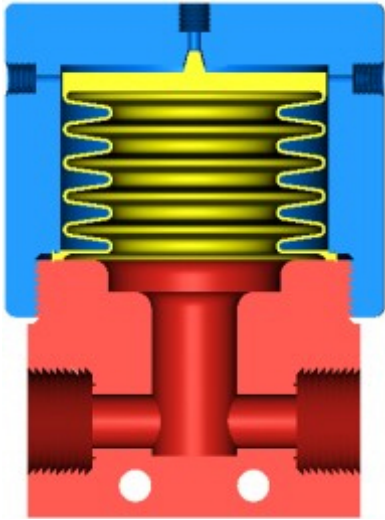

Did You Say That You Wanted A Pulsation Dampener With Only One Moving Part?

- Mount in line with any pump.
- Top of pump mounting available on AT Series Pumps.
- Reduces line pulsation to as low as plus or minus ½ PSI*
- 100% PTFE Construction.
- Temperatures to 200° Celsius.
- **Only One Moving Part.**

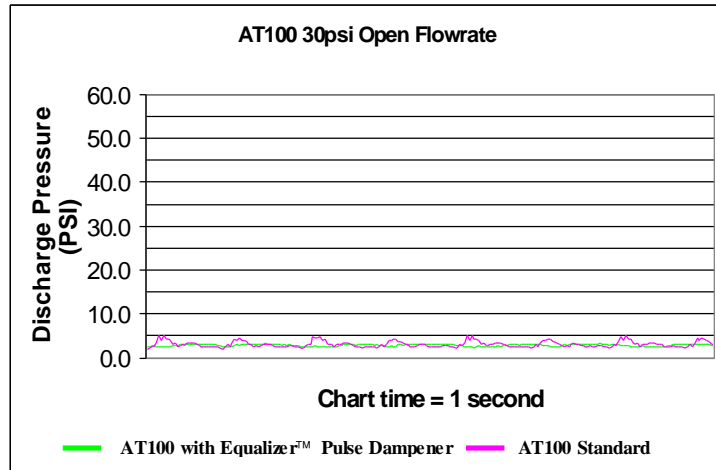

*Line pressure delta varies in relation to head pressure in line.

Flatliner™ Pulsation Dampeners

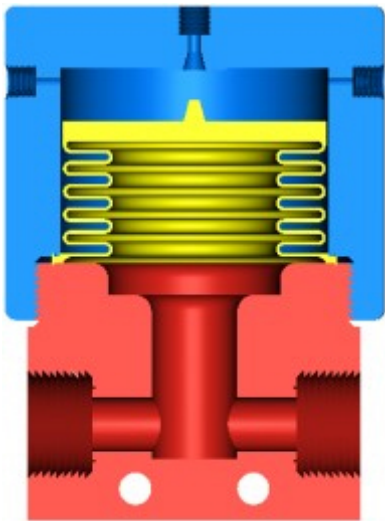

By White Knight

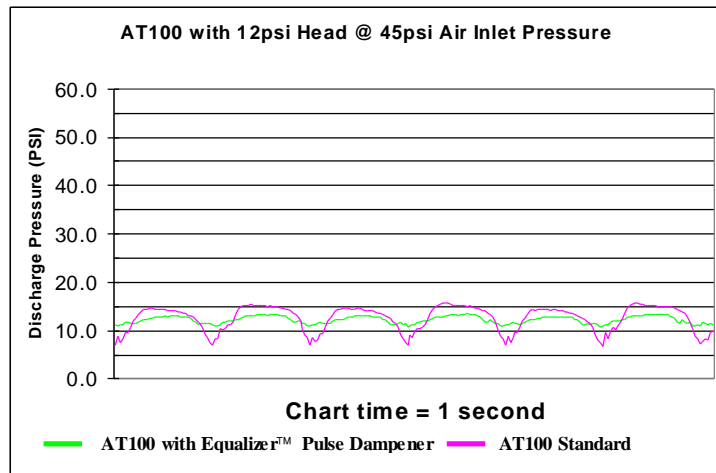

During stroke of the pump liquid pressure overrides air pressure and fills bellows with liquid.

AT100 with 30PSI supply, unrestricted flow

During shift of the pump air pressure overrides liquid pressure and moves liquid from bellows to outlet line to reduce line pressure delta.

AT100 with 12PSI of head pressure
